

LUCAS LABORDE

Software Engineer | Technical Lead | End-to-End Systems Builder

Buenos Aires, Argentina | lucaslaborde.trabajo@gmail.com | +54 11 6263-1035

github.com/labordetrabajo | linkedin.com/in/lucas-laborde-trabajo

PROFESSIONAL SUMMARY

Software Engineer and Technical Lead with hands-on experience designing, building, deploying and maintaining complete software systems. I work across frontend, backend, data, desktop applications, interactive kiosks, 3D experiences and production infrastructure. Strong background in requirement discovery, technical decision-making, client communication, troubleshooting and delivery of real-world systems that must perform reliably outside the development environment.

PROFESSIONAL EXPERIENCE

GyA Digital — Technical Lead / Software Engineer

2025 - Present

Buenos Aires, Argentina

- Lead technical delivery for interactive experiences, business applications, event systems and custom software projects.
- Translate client requirements into technical scope, architecture and delivery plans, connecting business needs with implementation.
- Design and build end-to-end solutions using React, Next.js, TypeScript, Node.js, Express, Prisma, Electron and Three.js.
- Build desktop and kiosk software for dedicated Windows environments, touch interfaces and offline/field workflows.
- Implement transactional flows including stock, orders, payment integrations, QR experiences, webhooks and administrative tools.
- Deploy and operate production systems on Linux/VPS environments using Nginx, PM2, SSL, DNS and Cloudflare.
- Coordinate technical tasks, select technologies, troubleshoot production issues and support project delivery.

Soluciones Programables — Freelance Full-Stack Developer

2017 - 2025

Buenos Aires, Argentina

- Designed and delivered custom web, mobile and business-management software for clients across multiple industries.
- Built backend services, APIs, databases and integrations focused on commercial operations and process automation.
- Maintained systems, networks and databases, combining software development with hands-on technical support.
- Delivered solutions from requirements gathering through implementation, deployment and ongoing support.

Foo Talent — Full-Stack Developer

2023 - 2024

Remote / Buenos Aires, Argentina

- Worked on backend development with Next.js and application-level functionality.
- Optimized database queries and data access patterns.
- Implemented UI designs based on Figma references using Tailwind CSS.

Upex — QA Analyst

2022 - 2023

Remote / Buenos Aires, Argentina

- Executed functional and regression testing within Agile/Scrum workflows.
- Managed defects and delivery tasks with Jira and XRay.
- Collaborated with development teams to validate product behavior and release quality.

Logg Hard Store — Technical Department Manager

Feb 2014 - Jan 2017

Buenos Aires Province, Argentina

- Managed the technical department and trained newly hired employees.
- Handled customer support and resolved technical issues and complaints.
- Coordinated warranty claims with suppliers and manufacturers.
- Supported customer-facing sales through social media, email, phone and in-store channels.
